Continua SQ4 Square Linear Series

Continua™ SQ4

Corelite SI

Architectural Quality, Contemporary Aesthetics

Watch creativity unravel

Say goodbye to lens gaps and breaks in illumination common in traditional linear runs. Seamless illumination and high performance is possible with a proprietary flexible continuous roll lens that won't ripple or bow over long lengths and high efficacies that provide significant energy savings. The result is high quality uniform illumination along the entire run length for a truly unique aesthetic.

Education

The Corelite Continua SQ4 is the ideal luminaire for the education market as it delivers the perfect combination of significant energy savings and aesthetic appeal to save money and brighten students' days.

- Schools spend greater than \$8 billion each year on energy.
- Lighting is ~20% of the electricity used by a typical school.
- LED lighting in schools can reduce the amount of energy by 50% and for cooling by up to 20%.
- Retrofitting to LED fixtures can lower students' risk of exposure to harmful contaminants (i.e. PCBs) and carcinogens.

Go further with excellent optical control

The Continua SQ4 provides uniform comfortable lighting with standard precision-engineered optical control.

Indirect Lighting – wide smooth batwing distribution enables broader row spacing with the potential to use less fixtures while achieving the target illumination.

Direct Lighting – Soft uniform illumination in a narrow aperture with several lumen packages providing a Unified Glare Rating (UGR) of less than 19 in several configurations.

Up to 2750 lumens per foot lumens per watt

VividTune

VividTune's tunable white solution allows you to easily adjust the color temperature of light - from warm white to cool white, creating an environment that fosters productivity and concentration.

Less is more

Make a big statement with Continua SQ4's compact square form.

Installation versatility

Get piece of mind with the use of Corelite's modular section design, through wiring, and simple yet robust joining features.

2', 4', 6', 8', 12' simple building blocks to create longer runs.

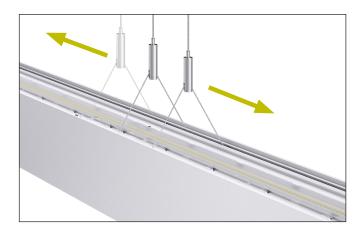

Joining fixtures is quick and provides a ridged and tight connection.

Navigate existing ceiling obstructions with variable mounting locations.

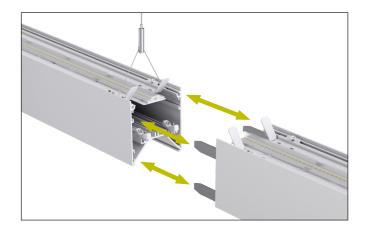

The 12 ft. unit advantage – Reduce time and labor costs during installation with 33% fewer fixtures, joint connections, and mounting points compared to 8 ft. unit max.

12 ft.

Continua[™] SQ4 with Perceive

Continued Enhancements

Distinct. Adaptable. Affordable.

Perceive[™] technology blends subtle styling with a proprietary optical system to create visual interest and provide comfortable illumination. Imagine creating the illusion of depth and adding dimensionality to any space. Available in suspended, surface and recessed mounting options.

Spatial depth

Dynamic three-dimensional forms on a smooth, flat surface. Provides subtle variety, texture, and spatial depth.

Human-centered

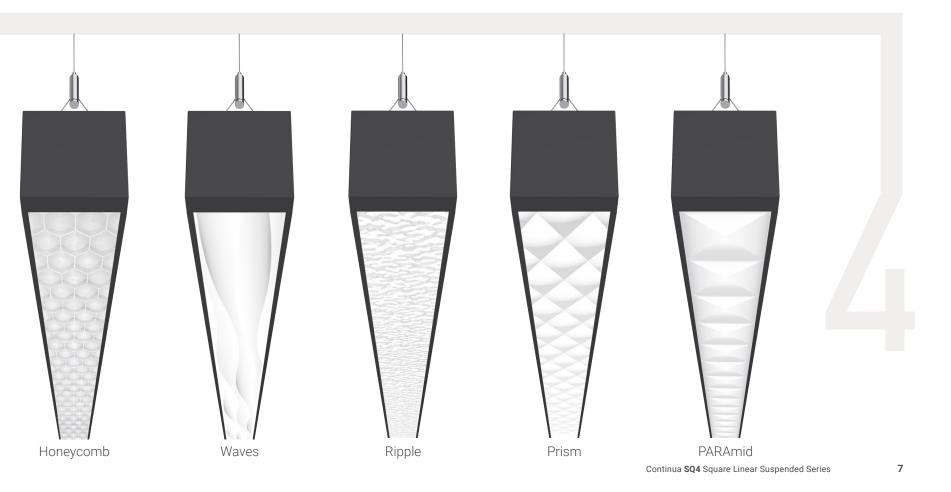

Contributes to meeting several WELL[™] v1 and v2 features including glare control and light quality.

Honeycomb

Continuous Lens

Perceive lenses give you that truly unique aesthetic that goes on and on. The proprietary flexible continuous roll lens provides a continuous look along the entire run length with no gaps or breaks.

Glare

The Corelite Continua SO4 with black and white louvered baffles is ideal for occupant well-being as it manages light glare for a more comfortable environment..

- Glare is defined as excessive brightness of the light-source, excessive brightness-contrasts and excessive quantity of light.
- WELL Building v2 defines acceptable light glare of UGR <16

Continua[™] SQ4 with Baffle

Continued Comfort

Say hello to a space that is more comfortable on the eyes. The black and white louvered baffles use an engineered optical system to reduce light glare while providing efficient lighting where needed in a space. The result is high quality, low UGR lighting while providing unique aesthetics and color combinations.

Batwing Optic

In addition to louvered baffles, the SQ4 comes standard with an indirect batwing optic for maximum visual comfort. With peak candela intensity of 112.5°, ceiling contrast can be kept to below 6:1 with fixtures 16' on center and suspended just 18" from the ceiling.

Shapes

are available in standard pre-defined shapes that are easy to specify for simple additions to your collaborative spaces.

Pre-defined Shapes:

- Squares
- Triangles
- Hexagons

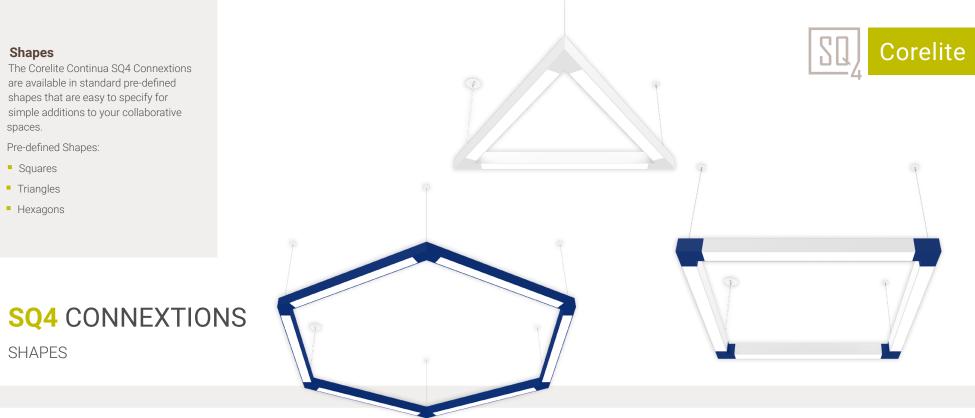

SHAPES

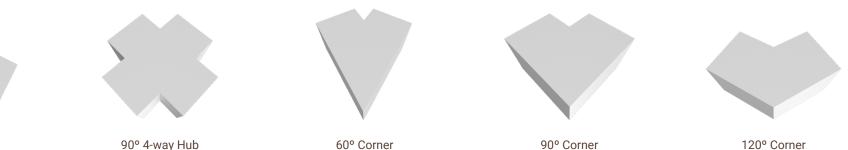

Architectural modularity at the speed of light

Corner and hub connectors, paired with standard SQ4 linear fixtures, gives you the building blocks to make clean shapes, hub-spoke configurations and patterns.

CONTINUING THE FAMILY TRADITION

Continua[™] SQ4 WALL

Architectural Quality, Contemporary Aesthetics

- Seamless illumination without lens breaks or gaps in lens
- Asymmetric Indirect distribution
- Integrated sensors and emergency
- ADA compliant

Continua[™] SQ4 Surface

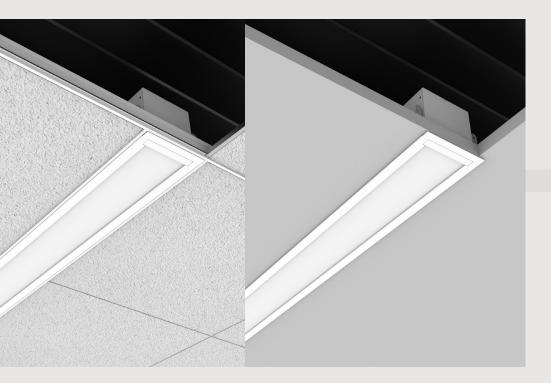

- Seamless illumination without lens breaks or gaps in lens
- Integrated sensors and emergency
- Optical Options: frosted lens, cross-blade baffles, perceive optics

CONTINUING THE FAMILY TRADITION

Continua[™] SQ4 Recessed

Architectural Quality, Contemporary Aesthetics

Seamless illumination without lens breaks or gaps in lens
Integration with 6 common architectural ceiling types
Optical Options: frosted lens or perceive optics
Housings lengths: 4ft, 8ft and continuous runs in 4ft increments

Connected lighting enabled solution

Corelite Continua SQ4 luminaires are designed to support integrated sensors providing code compliance and energy savings. The SQ4's unique sensor integration simplifies the control design without impacting the seamless illumination aesthetic. With sensors factory-installed in every fixture, the fixture layout enables optimal sensor coverage and controllability. With connected lighting, SQ4 makes your facility smarter so you can make smarter decisions.
