

A modern multi-story building courtyard. The ground floor has a wall of horizontal wood slats and large windows. The upper floors have balconies with glass railings and yellow-painted walls. In the center, there are large concrete planters filled with various green plants and trees. The floor is paved with grey tiles. Recessed LED downlights are visible in the ceiling and under the balconies.

HALO

Recessed LED Downlighting Product Selection Guide

September 2025

HALO

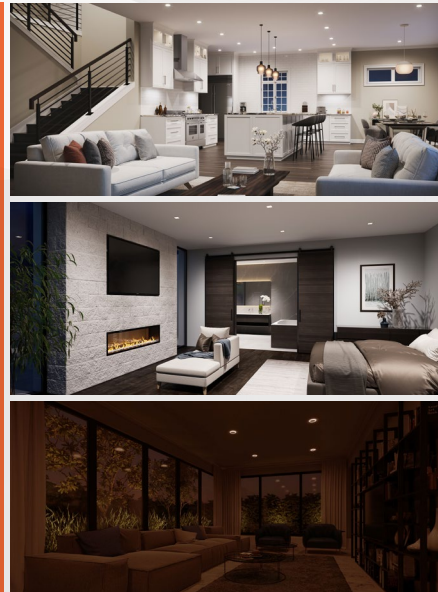

For over 65 years, **HALO** has been the industry leader in high-quality recessed downlighting, offering a full range of LED luminaires for new construction, renovation, or retrofits.

This Product Selection Guide compares products from 4 installation categories:

- 1. Canless Downlighting** - fixtures that mount directly to the ceiling with a remote junction box.
- 2. LED Trims (Retrofits)** - fixtures that mount into new or existing recessed housings.
- 3. Surface Mount Downlighting** - fixtures that install into junction boxes.
- 4. Integrated LED Downlighting** - high-end architectural fixtures for new construction or renovation.

Table of Contents

- 3 Slim (1/2"-Thin) Canless LED Downlights**
- 4 Canless LED Downlights**
- 6 Canless LED Adjustables**
- 8 LED Trims (Retrofits) – Downlights**
- 10 LED Trims (Retrofits) – Adjustables**
- 11 Integrated LED Downlights / Adjustables**
- 12 Surface Mount LED Downlights**

This Product Selection Guide is a straightforward yet powerful tool designed to assist with product comparisons and selection, enabling users to make informed choices based on features, performance, and value.
