ML Flex Series - Canless LED Downlighting 1-inch Round & Square Downlights

The ML Flex Series is a set of striking, high-performance fixtures available in four sizes (1, 2, 3, and 4-inch). ML Flex Canless luminaires share light engines between the two larger and two smaller aperture sizes making trim changes between size, shape (round or square), and downlight or wall wash effortless.

The ML Flex 1-inch fixtures are offered with an array of flanged downlight trims in smooth or baffle and round or square. Control beam angles with interchangeable 25°, 40°, and 55° optics. Customize lighting with selectable lumens and colors with flicker-free dimming to less than 5% in phase cut (120V) or 0-10V (120-277V) versions.

Typical Applications Residential, Hospitality, Healthcare, Retail
