Overview

Fifth Light's VOIP Lighting Software turns your VOIP Telephone into a versatile lighting control device. Adjust light levels on a single fixture or on a group basis from the VOIP telephone key pad or touch screen (if available). Set lighting scenes for presentations or to suit personal lighting preferences. The VOIP Lighting Software is ideally suited for conference rooms, offices or common areas.

Features

- Adjust light levels directly from a VOIP telephone and reduce the number of wallstations needed
- Control lights on an individual or on a group basis
- Apply lighting scenes for presentations, reading or to suit personal preferences
- Regulate access based on user profile
- Support multiple phone models on the same network through smart detection algorithms
- Web-based user interface avoids software installation
