### Skylight effect
Soft illumination with cube and curve options

### Onsite flexibility
Interchange lens options to customize your experience in any space

### Design flexibility
Available in 1x4, 2x2, and 2x4 sizes
### Modern, Suspended Aesthetics
Simple, elegant

### Intelligent lighting simplified
Beautifully wireless and connected

Connected Systems

# *Regress* Cube

A classic cube with clean lines and distinct corners provides aesthetic appeal and depth producing a desired skylight effect. With a choice of 1 and 2 inch options, these distinct shapes provide glare control, optical cut off, volumetric distribution and high efficiency performance.

**22ID-20-L835-CFR2**
Electronic Driver
Linear LED 3500K
Spacing criterion:
(ll) 1.19 x mounting height,
(⊥) 1.27 x mounting height
Lumens: 2010
Input Watts: 16.3W
Efficacy: 123.3 LPW
UGR: 17.2
Max Intensity (45-90º): 517 cd
Max Luminance (45-90º): 1965 (cd/m^2)

## Features

**Create architectural ceiling topography with rectangles and square shapes**

**1 and 2 inch regressed options are field convertible to drop versions**

**Fully luminous acrylic w/optical cutoff and low intensity reduces source glare**

**Earn points towards WELL and LEED certification**

**Wireless options for full control without the need for integrated sensors**

---

# *Regress* Curve

A curve shape softens spaces and enhances visual appeal with its simple and elegant design. The fully luminous acrylic has smooth lines and transitions at the end plate. Create wave patterns with regress and drop curves enhancing visual interest in high profile areas.

**22ID-20-L835-CNC**
Electronic Driver
Linear LED 3500K
Spacing criterion:
(ll) 1.2 x mounting height,
(⊥) 1.3 x mounting height
Lumens: 1936
Input Watts: 16.3W
Efficacy: 118.8 LPW
UGR: 17.3
Max Intensity (45-90º): 507 cd
Max Luminance (45-90º): 1926 (cd/m^2)

## Features

**Light the common spaces and create architectural visual interest with one fixture series**

**2 inch concave is field convertible to drop convex**
**Fully luminous acrylic with low intensity reduces source glare**

**1% 0-10V dimming is standard with Lutron, Step and DALI options**

**Wireless options for full control without the need for integrated sensors**

# *Drop* Cube

A drop cube adds structure to the space with smooth illumination and delivers architectural appeal. Cubes can be used to accentuate areas providing visual interest. Highly efficient performance enables code compliance and energy rebates.

**22ID-20-L835-CFD3**
Electronic Driver
Linear LED 3500K
Spacing criterion:
(II) 1.23 x mounting height,
(⊥) 1.34 x mounting height
Lumens: 2019
Input Watts: 16.3W
Efficacy: 123.9 LPW
UGR: 16.6
Max Intensity (45-90°): 441 cd
Max Luminance (45-90°): 1490 (cd/m^2)

## *Features*

*Create architectural ceiling topography with rectangles and square shapes*

*1, 2 and 3 inch drop options. 1 and 2 inch options are field convertible to regressed*

*Fully luminous acrylic with smooth lines and even illumination free of hot spots or striation*

*Volumetric distribution enables uplight and higher angle distribution for enhanced wall illumination*

*Wireless option for full control without sacrificing superb aesthetics*

# *Drop* Curve

A convex curve accentuates areas with visual interest by softening the space with gentle transitions. Combine with the regress looks to form gentle wave patterns. Highly efficient performance enables code compliance and energy rebates.

**22ID-20-L835-CNV**
Electronic Driver
Linear LED 3500K
Spacing criterion:
(II) 1.22 x mounting height,
(⊥) 1.28 x mounting height
Lumens: 1996
Input Watts: 16.3W
Efficacy: 122.5 LPW
UGR: 17.3
Max Intensity (45-90°): 461 cd
Max Luminance (45-90°): 1522 (cd/m^2)

## *Features*

*Create architectural ceiling topography with soft curves*

*2 inch drop option is a designer delighter*

*Fully luminous acrylic with smooth lines and even illumination free of hot spots or striation*

*2 inch drop option is field convertible to create regress versions where desired*

*Wireless option for full control without the need for integrated sensors*

# INDEPTH

Use InDepth to create office spaces where employees are comfortable and desire to spend their time. With its superior architectural aesthetics and visual appeal, InDepth enhances worker productivity, keeps employees engaged during meetings and helps them relax when they're taking a break. They will also take pride in knowing InDepth provides efficient LED lighting, reduces energy consumption and contributes to a sustainable workplace.

# INDEPTH

Use your imagination with large spaces and create shapes and designs through lighting that once were unimaginable. Unlock the design possibilities with InDepth by creating unique ceiling topography making spaces more attractive, appealing, and engaging. InDepth fixtures can also be combined with Shaper Sense acoustic lighting products to add high visual interest and enhance the comfort of the space for people to enjoy.

# INDEPTH

Customize your lighting design to complement your vision for the space. Explore the possibilities with InDepth's flexible designs whether that is recessed or suspended, concave or convex. Change your mind later? - No problem. InDepth enables you to change looks on-site or from the factory to meet your needs, when you need it. Connect fixtures through wireless control to enable IoT applications.

# IN**DEPTH**

Imagine being able to soften a space as technical as a lab through the lighting. InDepth makes settings such as these more comfortable and inviting! Create ceiling patterns/topography that can enable wayfinding to guide people and enhance their understanding of the space. Easy to clean and affordable, InDepth is the right choice for the education market.
