

HEALTHCARE
IMPROVE PATIENT
EXPERIENCE AND SAFETY.

Take your healthcare facility to the next level with Trellix Locate.

Trellix Locate delivers real-time indoor location service and management, by leveraging the Trellix smart spaces IoT platform.

Designed to allow you to monitor activities by sensing the location of your assets, staff and patients. The data can be used to improve business/production workflows, improve safety and security.

Asset Management

Trellix Locate gives you the ability to track the real-time location and manage distribution of your valuable mobile medical equipment.

- Reduce unnecessary equipment purchases and rental cost and minimize shortages of equipment
- Reduce and optimize inefficiencies associated with searching for mobile equipment

Environmental Monitoring

Real time temperature monitoring to maintain proper storage conditions to prevent spoilage.

- Accurate detection and alerts of changes in environmental conditions
- Automates regulatory compliance process, eliminate manual temperature logging

Patient/Staff Workflow and Contact Tracing

Trellix Locate technology replaces inefficient manual tracking systems with an automated system providing real-time patient location, movement and key interactions.

- Improve process compliance, optimize staff workflow and patient safety
- Enable healthcare staff to quickly and effectively execute on CDC recommendations by understanding patient/staff/equipment interactions to help contain spread of viruses and infections

Integrations

Trellix Location Services is engineered to deliver the most accurate location and condition data. Trellix offers an advanced open platform.

- Enable easy integration with major healthcare solutions including Nurse Call, Electronic Medical Records, Capacity Management, Bed Management, Asset Management and Computerized Maintenance Management

Connect. Analyze. Exchange.

Trellix is an IoT platform with smart applications for commercial spaces that connect intelligent sensors integrated into the light fixture to provide operational efficiency, improve occupant experience and deliver actionable insights through the aggregation of valuable data.

The most advanced digital integrated sensors

- Sensor capability: Zigbee, Bluetooth, PIR, Daylighting
- Dense sensor distribution
- Delivers maximum data for minimum price

Breakthrough Wireless Network

- Can manage thousands of sensors
- Minimal bandwidth required
- No batteries needed

24/7 Data Available

- Real-time data
- Compression data backhaul
- On premise computing for data

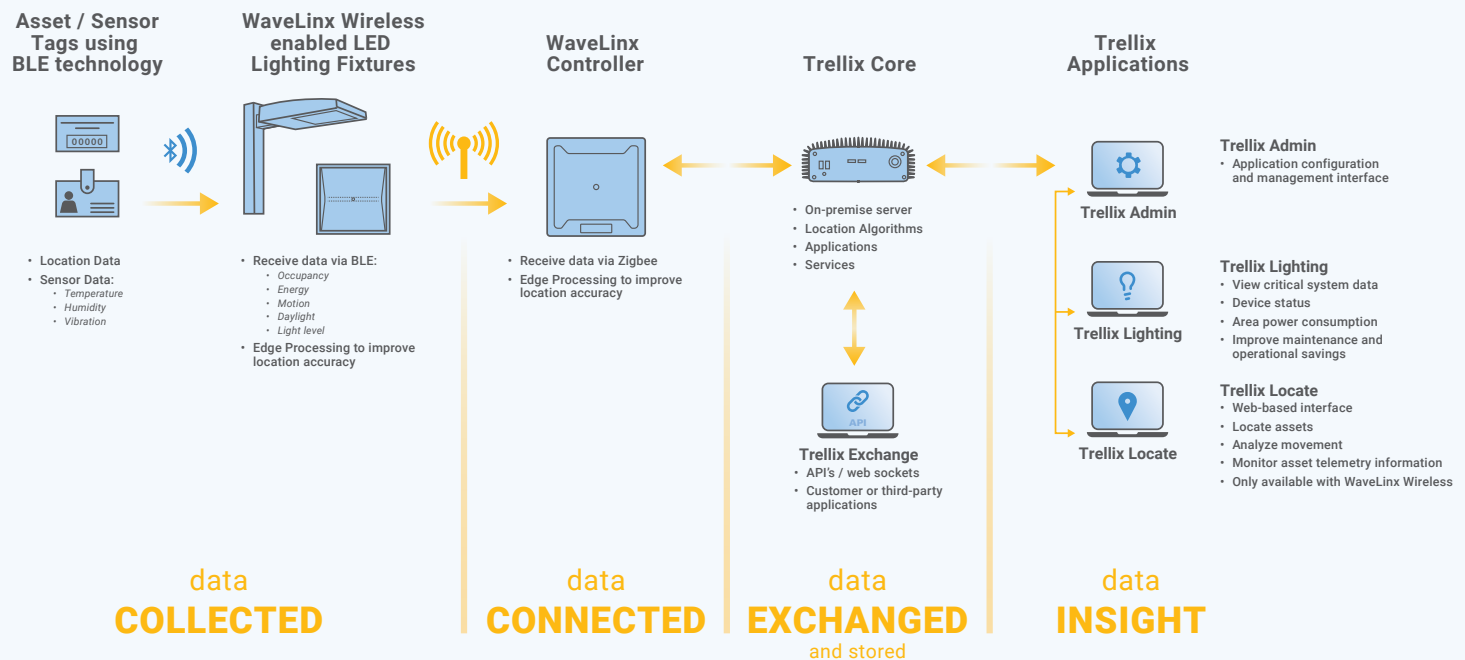

Data Security

- Unparalleled network security features
- UL2900-1 listed to the Standard for Software Cybersecurity for Network-Connectable Products

Trellix system architecture

Cooper Lighting Solutions' healthcare experience includes 200+ hospitals across North America.

35M sq ft of connected lighting and sensors deployed in thousands of installations.

Together...we can make every space limitless
