

**OFFICE**  
IMPROVE OCCUPANT  
EXPERIENCE AND SAFETY.

**Take your workplace to the next level with Trellix Locate.**

Trellix Locate delivers real-time indoor location service and management, by leveraging the Trellix smart spaces IoT platform.

Designed to allow you to monitor activities by sensing the location of your assets, staff and employees. The data can be used to improve business/production workflows, safety and security.

**Environmental Monitoring**

Real-time monitoring of temperature and humidity of a space.

- Enable a better occupant experience by monitoring and controlling temperature and humidity of spaces
- Operate HVAC systems more efficiently by connecting the data to BMS systems

**Locating People**

Real-time indoor location for mobile devices and equipment.

- Enable employees to find co-workers on demand to improve work place collaboration
- Enable employees to be efficient when locating equipment

**Space Utilization**

Real-time room level occupancy and location of mobile devices.

- Improve conference room and desk utilization by understanding usage of rooms and desks and enable flexible work spaces
- Enable facility directors to ensure 100% evacuation when required

**Workspace Analytics**

Understand longterm workspace analytics including space utilization and team dynamics.

- Enable staff to quickly and effectively execute on CDC guidelines by understanding employee interactions to help contain spread of viruses

**Enhance your workspace for today.  
Future-proof for tomorrow.**

# Connect. Analyze. Exchange.

Trellix is an IoT platform with smart applications for commercial spaces that connect intelligent sensors integrated into the light fixture to provide operational efficiency, improve occupant experience and deliver actionable insights through the aggregation of valuable data.

## The most advanced digital integrated sensors

- Sensor capability: Zigbee, Bluetooth, PIR, Daylighting
- Dense sensor distribution
- Delivers maximum data for minimum price

## Breakthrough Wireless Network

- Can manage thousands of sensors
- Minimal bandwidth required
- No batteries needed

## 24/7 Data Available

- Real-time data
- Compression data backhaul
- On premise computing for data

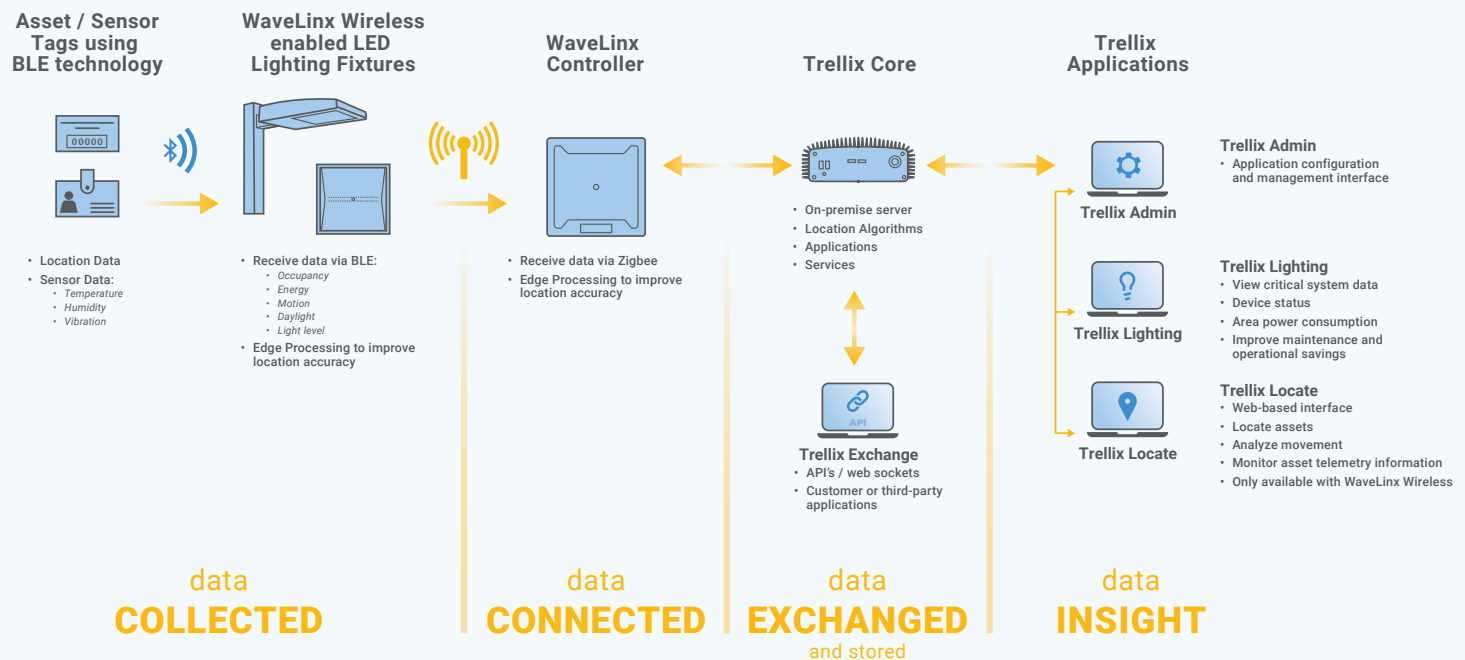

## Data Security

- Unparalleled network security features
- UL2900-1 listed to the Standard for Software Cybersecurity for Network-Connectable Products

## Trellix system architecture

Cooper Lighting Solutions has delivered solutions to major fortune 500 companies across North America.

35M sq ft of connected lighting and sensors deployed in thousands of installations.

Together...we can make every space limitless
