CCT Multiplier	80 CRI	90 CRI
3000K	0.944	0.796
3500K	1.000	0.869
4000K	1.010	0.864

Example Calculation:

025U-075D / 3500K / 80 CRI

Lumen Output selected = 1006 lms/ft

3500K / 90 CRI Desired

Lumen Adjustment Factor = 0.869

Adjusted Lumen Output = 1006 lms/ft x 0.869 = 874 lms/ft

Continua SQ luminaires with integrated sensor options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Refer to the WaveLinx system or Enlighted system pages for additional details and compatibility. Standard sensor layout is shown below. Custom sensor placement is available - consult factory. Please refer to sensor coverage pattern diagrams to ensure proper coverage for the application. Standard configurations are available in both individual fixtures and in continuous runs. Each fixture length can be individually controllable or grouped together with the integrated sensors. Default spacing is based on the maximum fixture length of 12ft and can be changed to 8ft sensor spacing for additional coverage by selecting the 8ft max fixture length option when ordering.
