

Outdoor DuraVolt Drivers

Features and Benefits

Surge events, voltage transients and dirty power continue to be some of the leading causes of premature failure in outdoor luminaires. Protect your investment and reduce down time by upgrading to universal high-voltage DuraVolt drivers from Advance. Featuring robust circuitry designed to withstand challenging electrical environments, DuraVolt helps minimize the negative impacts of power quality issues such as loss of neutrals, dirty power, and voltage swells.

DuraVolt

FEATURES

- 277V-480V operating window, with sustained excursions of +/-10%
- 6kV combination wave surge rating complies with ANSI C82.77-5 CAT C
- Power factor at max load >.95
- SR (Sensor-Ready) / D4i DALI configurations available
- Available in multiple luminaire product families
