LUMADAPT: MORE THAN A LIGHT, IT'S A COMPLETE SYSTEM

The Lumadapt system applies future-proofed technologies and a digital approach for greater economy, efficiency, and adaptability to meet your changing needs. As the only multi-feature LED sports-lighting system that has remote-upgrade capability, Lumadapt gives you more control over your venue than you ever thought possible. A Lumadapt system will make your venue more effective; more flexible; and, most importantly, better lit.

REVOLUTIONARY FLEX LED TECHNOLOGY

The greatest control ever developed for sports lighting, with optical-beam tuning for precision light placement—Fill the entire venue as fans arrive, then just light the game once the action starts.

CONTROL AND FLEXIBILITY LIKE NEVER BEFORE

The Lumadapt system offers a degree of adaptability that no traditional light can match, with remote upgrades to keep you ready for the future.

BEAM TUNING FOR DYNAMIC ADJUSTMENT OF LENS OPTICS

Illuminate your entire venue before the action, then use precision beam tuning to narrow the light onto just the field.

BUILT-IN SECONDARY RGBA LIGHT SYSTEM

Dazzle your audiences by adding color to your venue, all in the same system.

KELVIN COLOR-TEMPERATURE TUNING

Adjust your lighting's Kelvin color temperature for multiple events.

EXTENDED SERVICE WARRANTY

Increase the duration of your warranty based on your actual needs.

PREDICTIVE MAINTENANCE THROUGH HEALTH MONITORING

Use comprehensive monitoring to prevent system-affecting issues before they impact your venue.

SYSTEM-PERFORMANCE REPORTING WITH CLOUD STORAGE

Get the metrics and data to see exactly how your lights perform over time.

SOFTWARE MODULES

Download software modules to add new capabilities, such as light scheduling, charge per use, and prebuilt dynamic lighting scenes.

The Best Light For Players, Fans And Your Budget

Spend Money On Only What You Need

Our retrofitting process puts a lighter, more powerful system on your existing infrastructure to reduce installation costs. Because Lumadapt is also more efficient than competing LED, we make sure that you start within budget, and stay within budget.

Unrivaled Fan Experience

With crisp, clear light and dynamic scenes for amazing celebrations, your fans on campus will be more engaged than ever. A lighting system designed for broadcasts in HD, 4k, and even 8k means that the fans cheering from home won't miss a beat either.

Consume Less, Do More

Our system uses less energy to produce higher-quality light, reducing energy consumption by up to 25% over traditional LEDs. Our Lumadapt system collects and displays data on your dashboard, showing you how your lights are performing and so you can run them most efficiently.

Always Upgradable

With Ephesus, you always have the latest lighting technology on-hand. Our Lumadapt system lets you access features remotely as your needs and budget evolve. We can also provide a fiber-optic network for enhanced flexibility and expandability.
